PROJECT

Web Developer

2025-2026

Student News and Event Immediate Access Using Web-based System at Cebu Eastern College Inc.

Student News and Events Immediate Access Using Web-based System is a system that aims to provide an efficient and centralized platform that enables students, faculty and staff to easily access school news, announcement, and event information in real-time.

Web Developer

2024

Personal Portfolio

My personal portfolio project is a professionally designed web application that showcases my skills, personal information, and completed projects in a clear and visually appealing way. It highlights my abilities in web development, programming, and UI/UX design while demonstrating my experience with modern technologies and responsive design principles. The portfolio serves as a platform to present my academic achievements, technical expertise, and project accomplishments, allowing employers and clients to easily explore my work and better understand my capabilities as an aspiring IT professional.
